Re: Recommendation for Dr. Martin Sieber

It is with great pleasure that I provide this letter of recommendation for Dr. Martin Sieber, who I have known and worked with for over 25 years.

Martin is very well known and respected throughout the global animal breeding industry, especially the dairy industry. Martin and I had the opportunity to travel together extensively when he was with the National Association of Animal Breeders, and we jointly presented educational and training modules on genetics and animal breeding to breeders, industry leaders, and government officials across the globe. Nearly everyone in the industry has had some interaction with Martin over his extensive career.

Martin has passion for animal breeding and genetics, and has expanded his expertise into various reproductive and biotechnology disciplines in recent years. His language skills allow him to easily work in many regions on the world without having to go through a translator. Martin is comfortable with international travel as is clear from his extensive international experiences.

With regards,

Denny Funk
